

ACCESS TO IMAGES

across the enterprise, anytime, anywhere, securely.

Zero Footprint Viewer

Diagnostic quality for anywhere access with no software installed

Server-Side Rendering

For fast access to images

Advanced Cybersecurity

No data transmitted or stored locally

Protect your investment in your PACS/VNA with true interoperability across systems

The Exa™ Enterprise Imaging solution facilitates the viewing of large medical imaging files across the enterprise, such as:

- 3D Mammography
- Cardiac Imaging

The Exa diagnostic quality Zero Footprint Universal Viewer allows clinicians to view images from any modality and any vendor.

Exa delivers relevant priors from any existing PACS or Vendor Neutral Archive (VNA) quickly and securely.

Exa allows for existing PACS and VNA investments to remain intact while using fully integrated supplemental viewers.
