

# Easy to Access, Easy to Use.

## Exa® Billing

Exa Billing, like the other modules on the Exa Platform, benefits from Zero Footprint Viewing and Single Database Integration. Zero Footprint viewing allows for access to the billing software from any web-enabled device, regardless of operating system or browser. This gives billing departments the flexibility to work in-house or outsource their tasks.

The Exa Billing module shares the same integrated database as the other modules on the platform, simplifying patient data entry and reducing the possibility of discrepancies in data. You are eliminating error and increasing efficiency.

Send electronic claims to ANY clearing house and receive electronic payments

Fast claim coding with radiology reports available on a secondary monitor

Revenue Cycle Management

Letters of Protection Processing have ability to age up to 24 months

### Quickly Create and Submit Clean Claims

Exa lets you set up study workflow that will make claim coding and submission a snap. With the integrated database, no information is lost in translation or left behind! Exa ensures your billing department is able to create and submit a clean claim the first time!

### Electronic Payment Processing

In the steps to go paperless, Exa Billing offers the ability to not only send out claims electronically but also receive payments back electronically. Konica Minolta strives to streamline the billing process and aid your efforts to a paperless facility.

### Extensive Follow-Up Features

With each claim, every user has the ability to create a tickler date. Within that, users have the ability to open the inquiry screen to view all notes and information previously added without having to exit the screen. This allows the billing departments to accurately, and efficiently follow-up on claims.

### Integrated Single Database

The Integrated database allows for seamless reporting, including Billing and RIS report analysis. This also allows billing departments to work efficiently and accurately with their medical practices. This includes an easy to use and customizable workflow builder so the needs of every department are met and satisfied.

### Enhanced Security

- With Server-Side Rendering technology, there is no data transferred to or stored on workstations. Exa is able to minimize the unwanted exposure to patient data.

### Easy Accessibility

- Give your billing department the freedom to move. Exa's Zero Footprint technology provides flexibility for billing staff, as well as administrators, to operate on any workstation in the office or remote.
