

# Transforming Radiology Workflow With Intuitive and Intelligent Solutions.

In today's rapidly evolving healthcare landscape, efficiency and precision are paramount. **Exa® RIS** is a groundbreaking, web-based software application designed to revolutionize radiology workflow. Streamline your scheduling process using customizable scheduling rules, one-click eligibility checks and insurance authorization workflow automation. With advanced tools like these, Exa RIS enhances communication and coordination with both patients and referring physicians, ensuring optimal patient care and operational efficiency.

For a truly unique end-to-end workflow solution, take the power of Exa RIS to the next level by combining it with **Exa® PACS** in one single integrated database. Unlimited scalability and flexible configuration options allow you to meet your specific workflow requirements and drive efficiency while preserving data security and integrity through robust cybersecurity measures.

## Revolutionizing Efficiency and Patient Care.

Exa RIS is not just about improving efficiency; it's about empowering your practice to grow and succeed. The platform's intuitive user interfaces, strong marketing reports and advanced features give you the tools to attract more referring physicians, increase patient throughput and boost overall productivity. Whether you are a single-facility practice or a multi-location enterprise, Exa RIS adapts to your evolving needs, allowing your radiology practice to thrive in a competitive market.

### Intelligent Patient Scheduling

An advanced scheduling system enhances patient scheduling across healthcare settings to streamline workflows, boost patient throughput and maximize resource utilization for imaging centers of all sizes. The intuitive and intelligent scheduling wizard utilizes backend logic to identify optimal appointment slots by considering patient location, resource availability and insurance verification needs.

- **Streamlined Care:** Schedule multiple exams for the same patient on the same day and location, ensuring a seamless patient experience
- **Customizable Scheduling Rules:** Efficiently allocate resources and maximize timeslots based on technologist skills and appointment
- **Color-Coded Scheduler:** Identify time concerns to help staff select more appropriate timeslots and prevent double-booking
- **Effortless Rescheduling:** Easily reschedule patients without re-entering exam and CPT information
- **Efficient Walk-In Handling:** Increase efficiency and flexibility by effectively accommodating walk-in patients
- **Regionalized or Centralized Scheduling:** Utilize patient zip codes to find the next available appointment at the closest location
- **Role Based Access Control:** Implement strict access controls to ensure only authorized personnel can view sensitive patient data and functionalities
- **Intelligent Scheduling Wizard:** Uses advanced algorithms and dynamic scheduling to enhance overall efficiency

The screenshot displays the Exa RIS scheduling interface. At the top, there are navigation tabs: RADIOLOGY, FACILITY: RALEIGH CENTER, MY FACILITY, FILTER, FIND SLOTS, WALK-IN APPOINTMENT, and QUICK BLOCK. The date is set to MONDAY, AUGUST 26, 2024, 9:04 AM EDT (-04:00). The patient information pop-up for Jessica A. Rader (DOB: 01/01/1999, 1002, F, 25Y) is open, showing search criteria and a list of available appointment slots. The slots include various times and locations such as Raleigh Center (US Room 2-6), MOBILE FACILITY (MOBILE US01), and Garner NC HCIT (OUS). The background shows a calendar grid with different colored blocks representing scheduled exams and procedures.

## Automated Communication: Enhancing Coordination and Reducing No-Shows

Exa RIS enhances communication and coordination through automated notifications sent via text, email or voice to reduce no-shows and cancellations. Plus, you can easily send notifications to referring physicians based on study status.

- **Automated Patient Notifications:** Reduce no-shows and cancellations with scheduling confirmations and appointment reminders sent via text, email or voice
- **Automated Referring Physician Notifications:** Seamlessly send notifications to referring physicians via fax or email, triggered by study status, using our custom workflow builder

## Portals: Enhancing Access and Convenience for Physicians and Patients\*

Exa RIS facilitates the sharing of medical images and reports via secure, web-based portals.

### REFERRING PHYSICIAN PORTAL

- **Seamless Access:** View images, reports and scanned documents from any device without downloads, configuration or VPN
- **Efficient Order Management:** Electronically create, send and sign off on exam orders
- **Patient Preparation:** Provide patients with exam prep documentation
- **DICOM Import Capability:** Import prior exams for comparisons and comprehensive patient records
- **Emergency Access:** Quickly access patient studies and records in emergency situations
- **DICOM Export Feature:** Export DICOM patient studies with CD burner or download

### PATIENT PORTAL

- **Streamlined Registration:** Complete administrative forms prior to appointments for a smooth check-in process
- **Easy Access to Records:** View, download, save and print images and reports
- **Document Upload:** Upload important documents such as insurance information, ID cards, requisitions and prior reports

### ATTORNEY PORTAL

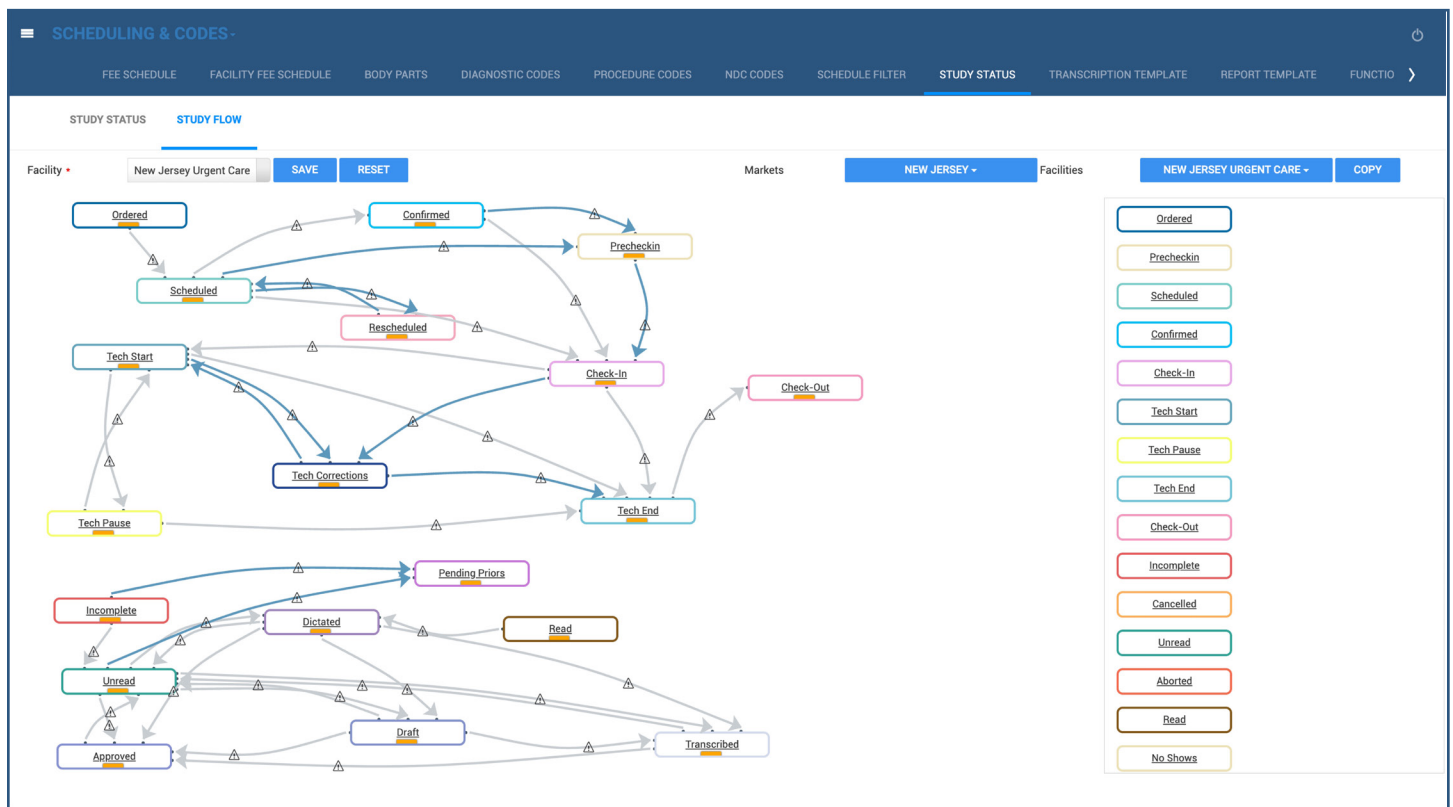

- **DICOM Study Sharing:** Allows secure sharing of DICOM studies with legal professionals
- **Access to Approved Reports:** Attorneys can view and download approved reports, streamlining case management
- **Document Management:** Facilitates the uploading and viewing of relevant documents ensuring all case-related medical information is readily available for legal proceedings

## Customizable Workflow Engine: Tailored Imaging Solutions for Every Practice

Imaging workflow can vary drastically from practice to practice. With Exa RIS, you can build your workflow based on your specific needs.

- **Authorization Rules:** Create authorization rules based on certain procedures and insurance providers.
- **Dynamic Workflow Configuration:** Customize and build your imaging workflow using intuitive drag and drop status options to design your preferred imaging workflow.
- **Automated Workflows:** Automate your workflow based on timing needs and actions between statuses, including triggering HL7 messages and dicom routing rules and triggering customized email messages to providers

## Single Integrated Database

Konica Minolta's Exa Platform offers a truly integrated user experience, with a unified patient chart that ensures any changes made to a patient or exam record are automatically updated across the entire data set. Optional modules on the platform include Exa PACS and Exa<sup>®</sup> Billing.

- **Unified Access:** Log in to one application to accomplish multiple workflows and access the entire study/patient file
- **Effective Data Management:** Eliminate duplicate data entry, from order creation to the final report to claim submission
- **Automated Routing:** Automation can be built into status changes to route exams where they need to be
- **Modality Worklist Integration:** Automatically populates the modality worklist based on status
- **Seamless Order Result Matching:** Matches radiology results to the referring physician orders sent via their EMR
- **Data Integrity:** Ensures data integrity throughout the entire record

## Integrated Billing Module: Streamline Revenue Cycle Management

To help you file a clean claim the first time, an integrated billing module delivers full revenue cycle management features.

- **Immediate Data Access:** Access billing data instantly, along with the radiology report and any other documents uploaded or scanned into the order or patient chart
- **Electronic Claims Processing:** Send electronic claims to any clearinghouse and receive electronic payments efficiently
- **Fast Claim Coding:** Speed up claim coding with the radiology report available on a secondary monitor
- **Simplified Data Entry:** Simplify patient data entry and reduce the possibility of discrepancies and user error

## Exa Clear: Automate Insurance-Related Tasks for Enhanced Productivity and Profitability

Exa Clear automates common clinical and administrative tasks to help your practice optimize reimbursements and increase revenue – without a separate workstation or portal. Integrated directly into the Exa RIS workflow, it delivers fully automated, real-time insurance, co-pay and billing submission, allowing practices to capture covered and non-covered costs to improve profitability.

It includes three separate yet integrated modules:

- **Authorization:** Automatically satisfy specific authorization requirements for every procedure, in every state, for every payer
- **Estimation:** Provide the patient with an accurate upfront estimate for out-of-pocket costs
- **Eligibility:** Seamlessly verify patient eligibility for an imaging procedure during appointment scheduling

Eligibility / Estimation: Niewind, Danielle E (NC1577) 03/03/1992, F, 32Y

Patient	Visit	Insurance
Patient Name Niewind, Danielle E	Procedures 74181, 71046	Provider Name Aetna-Test1
Home Phone	Date of Service 06/12/2024	Address PO Box 14770 LEXINGTON, KY 40502
Mobile Phone (228)669-5291	Referring Physician Smith, John	Policy Number 12345
		Subscriber Name Niewind, Danielle E
		Subscriber DOB 03/03/1992

Eligibility Status Benefits Date 06/12/2024

ELIGIBILITY **ESTIMATION**

Co-Insurance	20%
Co-Pay	\$0.00
Deductible / Max	\$740.00 / \$4500.00
Max Balance Due	\$0.00
Max Out-of-Pocket	\$6850.00

**Estimated Patient Balance: \$740.00**

The balance above is the estimated amount to be collected from the patient including the deductible, copay and coinsurance amounts for the selected procedures:

- MRI Abdomen without Contrast - CPT 74181
- XR Chest, 2 View - CPT 71046

To view an estimate for a specific procedure or a different combination of procedures, change selected studies above and click UPDATE SELECTED.
