FOR IMMEDIATE RELEASE

Konica Minolta Healthcare Introduces AeroRemote™ Active Monitoring Capability at RSNA 2016

Wayne, NJ, NOVEMBER 27, 2016 – During the 2016 Annual Meeting of the Radiological Society of North America (RSNA) Konica Minolta Healthcare (Booth 1919) introduces the AeroRemote monitoring service for Konica Minolta AeroDR® Systems. AeroRemote is a cloud-based, active monitoring solution that detects and reports critical and ongoing performance issues with the AeroDR Wireless Flat Panel Detectors, providing automatic reports that can be reviewed anywhere, anytime.

This allows for immediate intervention with urgent situations and provides the ability to address potential system or user issues early, before they escalate. AeroRemote offers secure, real-time information needed to maximize system utilization, minimize service interruptions, and evaluate personnel performance, enabling better decisions, sooner. It produces monthly reports, by system and user, detailing usage and personnel productivity, providing at-a-glance information that facilitates a more efficient operation, supports user best practices, and optimizes AeroDR imaging assets.

Using predictive analytics, AeroRemote gathers hardware status to prescribe actions before an unexpected issue arises, saving downtime by scheduling service before problems occur. Real-time monitoring of system parameters and events—from drop detection to component performance—lets users make faster and better-informed support decisions. Additionally, it encourages proper user handling by alerting managers when a digital radiography (DR) panel has been dropped and sends diagnostic information on panel performance using the panel check tool.

“AeroRemote reflects the transformation of service that’s under way,” explained Steven Eisner, Senior Product Marketing Manager, Konica Minolta Healthcare Americas, Inc. “It represents an important step in proactive management by providing more data to make better service and usage decisions that can reveal a lot of information, improving productivity and maximizing patient safety. For users of our AeroDR Systems, this moves the support needle from reactive and preventive to predictive and prescriptive management.”

Better decisions, sooner.

About Konica Minolta Healthcare Americas, Inc.

Konica Minolta Healthcare Americas, Inc. is a world-class provider and market leader in medical diagnostic imaging and healthcare information technology. With over 75 years of endless innovation, Konica Minolta is globally recognized as a leader providing cutting-edge technologies and comprehensive support aimed at providing real solutions to meet customer's needs. Konica Minolta Healthcare Americas, Inc., headquartered in Wayne, NJ, is a unit of Konica Minolta, Inc. (TSE:4902). For more information on Konica Minolta Healthcare Americas, Inc., please visit www.konicaminolta.com/medicalusa.

Company name	KONICA MINOLTA, INC.
Headquarters	JP TOWER, 2-7-2 Marunouchi, Chiyoda-ku, Tokyo, Japan
Founded	December 1936
FY 2015 Revenue	\$8.6 Billion
Number of employees	Approx. 41,600 (2015)
Business Lines	The Konica Minolta Group operates in sectors ranging from business technologies, where our products are typified by MFPs (multi-functional peripherals), and Industrial Business (former Optics Business), where our products include pickup lenses for optical disks, and TAC film, a key material used in LCD panels, to healthcare, where we make digital X-ray diagnostic imaging systems.
