

# Monitor Black-Out Feature

- To renew the screen
- "Touch" the monitor
  - Move the mouse
  - Input character on keyboard

## Included CS-7 Software application

**Monitor Black-Out Feature** provides clinical confidence and protects patient health information with the touch of a button. This feature can improve the ability to work with the CS-7 in common areas by allowing a quick and easy way of turning off the video display of the CS-7 imaging system, during periods of non-use and transport helping to keep patient data confidential.
