

Mammography Diagnosis and Reporting

exa™

i
Ikonopedia

Save time, improve productivity and reduce errors!

Open studies, diagnose, report and track patient care faster and more efficiently than any other solution

Integration

- Patient registration data shared between Exa and Ikonopedia
- Study information passed from Exa to Ikonopedia
- Ikonopedia reporting module launched directly from Exa study screen while maintaining user login credentials
- Appropriate Ikonopedia template used based on study
- Structured report from Ikonopedia stored in Exa with the study
- Ikonopedia Bi-Rad follow-up built into the Exa workflow engine

Benefit

- One-time registration
- Eliminate double-entry of patient study information, thus reducing errors, such as wrong patient and laterality reporting
- Single sign-in
- Saves time in report creation
- Ease of report access

.....▶ **Automatic notification to Care Coordinator for Bi-Rad categories which require a follow-up exam significantly reduces clerical work and provides timely patient care. This completely closes the patient follow-up loop to ensure no patient or clinical concern is lost to lack of follow up, in any scenario.**
