## Apache Log4j Security Vulnerability

### Log4j Vulnerability Statement

There is a recently discovered critical vulnerability that impacts one of the most popular open-source Java logging libraries, Apache Log4j, also referred to as security vulnerability CVE-2021-44228, named “**Log4j**”.

In response to this, Konica Minolta Healthcare Americas (KMHA) is actively assessing our manufactured products to determine possible impact. We are in the process of researching and identifying any remediations needed.

**The following KMHA Manufactured products are excluded from this vulnerability:**

✓ All DryPro Printers	✓ AeroDR Products	✓ EXA PACS Software
✓ CS-7 Software	✓ Regius CR Readers	✓ Symmetry PACS Software
✓ DI-X1	✓ Sigma CR Readers	✓ Printlink
✓ ImagePilot (pending verification)	✓ Opal Pacs (pending verification)	✓ HS1, HS2 Ultrasounds
✓ Opal Acquire (pending verification)	✓ Ultra Software (pending verification)	✓ MX1 Ultrasounds

Though no direct impact on the above products was identified, there may be questions about 3<sup>rd</sup>-party products that may be integrated or dependent services and not publicly accessible to KMHA. We are working closely with external vendors and service providers to collect information and ensure they are remediating, if necessary. We will continue to diligently monitor the situation and provide any additional necessary updates. For the latest information on this vulnerability, please visit the [Konica Minolta Healthcare Cybersecurity website](#).
